

Our Mission

Through excellence in education and a quality-focused environment, we provide our healthcare community with competent and compassionate radiographers.

Our Goals

Goal: Develop Competent Radiographers

- The student will apply positioning skills.
- The student will practice radiation protection.

Goal: The student will develop critical thinking skills.

- The student will modify routine imaging protocols for non-routine or trauma patients.
- The student will evaluate radiographic images for proper positioning and image quality.

Goal: The student will practice effective communication skills.

- The student will demonstrate oral communication skills.
- The student will develop written communication skills.

Goal: The student/graduate demonstrates the values and ethics of a radiographer.

- The student will demonstrate professional qualities in the clinical setting.
- The student/graduate will demonstrate continued professional growth through continuous learning.
